

**CONSTRUCTION, EXTENSION, RENOVATION OF A BUILDING OR A SUBDIVISION  
IN A LANDSLIDE ZONE**

Owner: \_\_\_\_\_

Lot: \_\_\_\_\_

Roll N°: \_\_\_\_\_

Type of work: \_\_\_\_\_

*Ref: Article 4.11 and following of the planning by-law 177-01*

We are aware that the location of the construction or subdivision described above will be situated:

- In a hypothetical risk landslide zone (ZRH) and we discharge the municipality of all responsibility and assume all responsibility for performing the work to be done as well as all that could arise as to the issuance of a construction or subdivision permit in such a zone.
- In a low risk landslide zone (ZRF) and we discharge the municipality of all responsibility and assume all responsibility for performing the work to be done as well as all that could arise as to the issuance of a construction or subdivision permit in such a zone.
- In a medium risk landslide zone (ZRM) and we discharge the municipality of any and all responsibility as to the issuance of a construction or subdivision permit regardless of the nature.  
Furthermore, I agree to present a detailed report and a confirmation from a soil engineer, consisting of the elements as described in article 4.11.3 of zoning by-law 117-01.
- In a high risk landslide zone (ZRE) and we discharge the municipality of any and all responsibility as to the issuance of a construction or subdivision permit regardless of the nature.  
Furthermore, I agree to present a detailed report and a confirmation from a soil engineer, consisting of the elements as described in article 4.11.3 of zoning by-law 117-01.

- \_\_\_\_\_
- We are committed to provide a certificate from a soil engineer showing that the land is suitable to receive the proposed construction or subdivision and will comply with the provision of the urban planning by-laws of the municipality of Pontiac.**
